

# Affordable Enterprise ZFS Storage!

Enterprise ZFS Storage.  
Easy and Affordable!

## Storage Features

### Multi-Level Data Protection

- Heterogeneous Block & File Replication
- End-to-End Data Integrity Through ZFS File System
- Supports Full Active/Active HA Configuration
- Synchronous or Asynchronous DR Replication

### Unique Management Capabilities

- Supports NAS and SAN (NFS/CIFS & iSCSI/FC)
- InBand Compression, Dedupe, and in Box Virus Scan
- Non-Disruptive Volume Grow/Shrink & Thin Provisioning

### Storage Without Limits

- No Storage Limits (Unlimited Snapshots/Clones)
- Native Support for SSD Technology
- Unlimited File System Size, Snapshots, and Clones
- Tiered Storage through Hybrid Storage Pooling

## Storage Advantages

### Back Up

In-line deduplication, replication and potential as a multi-protocol target make us an ideal backup target

### Virtualization (VMWare, XEN, Hyper-V)

Hybrid storage pooling (native SSD), hot data optimization, management, deduplication, snap shots, replication, compression make us an ideal solution for virtualization

### Cloud

Strong Virtualization, low cost enterprise HA cluster, replication make NexentaStor a good platform for cloud infrastructure

### Open Storage
